## Fields of Application

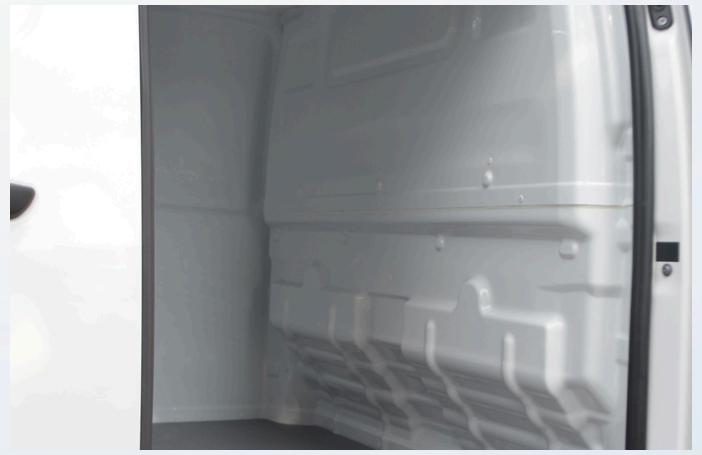

## Product Features

- 100% HACCP Compliant
- Made of preformed panels applied to the vehicle walls
- No modifications to structural parts; panel weight remains within 5% of the vehicle's curb weight
- No need to update the vehicle registration
- Panels are individually replaceable in case of damage or accident
- Access to lights and other devices is maintained, allowing for easy routine maintenance
- The kit is removable and transferable to another identical vehicle
- Full payload capacity and cargo volume are preserved
- Waterproof
- Easy to clean, including with pressure washers and steam machines
- Resistant to disinfectants

## Accessories & Optional Features

- Reinforced Floor
- Modular Load Shelves
- Dedicated Temperature Control System for the Cargo Area
- Lightweight PLUS Insulation
- Load Securing System
- Ventilation/Airflow System

## Compliance with Regulations

Compliant with HACCP regulations, CE Directive 852/2004 regarding washable, sanitizable surfaces suitable for food contact

Compliant with Regulation (EU) 852/2004 ADR regulations for the transport of hazardous materials (certain classes)

Compliant with European Guidelines 2013/C 343/03 on Good Distribution Practices (GDP) for medicinal products for human use

Compliant with UNI ISO 3795:1992 standard for combustion behavior testing

## Information Sheet

**Material:** 100% Recyclable ABS

**Panel Thickness:** 3/3.5mm

**Installation Weight:** L1 H1 47 Kg - L2 H1 52 Kg

**Lightweight Insulation:** Optional upon request

**Floor:** ABS or reinforced

polypropylene as an option

**Assembly Time:** 600 minutes

**Fastening System:** With rivets

### Vehicle Variants:

**L1H1** (With 1 or 2 side doors)

**L2H1** (With 1 or 2 side doors)
