

#### PRODUCT CHARACTERISTICS

- **Low weight of the conversion (from a minimum of 45 kg to a maximum of 150 kg based on the volume of the vehicle) and low impact on the reduction of mileage**
- **Composed of ABS or FIBERGLASS panels (3/4 mm thickness) which follow the shape of the vehicle internal sides, with or without light insulation;**
- **Plug & Play System easy to assemble with all the necessary material provided with the kit;**
- **The kit is fixed on the vehicle with standard rivets and the sealant used for the finishing operations is waterproof and compatible with food transportation;**
- **No changes on cargo area and moreover the total weight of the panels is within 5% of the vehicle tare;**
- **No need to update the registration certificate;**
- **No tampering with the vehicle structure that could damage the electric motor and the batteries**
- **In case of accident the panels can be replaced separately;**
- **Access to lights and other original devices is maintained so the normal maintenance can be carried out easily;**
- **The Kit can be dismantled and reassembled on another identical vehicle;**
- **The entire payload and load capacity is maintained;**
- **Easy washing even with a pressure washer and steam machines and no contact of water or other substances with the metal structure of the vehicle;**
